**WIRELESS TELECOMMUNICATIONS BUREAU SEEKS COMMENT ON THE
AMERICAN TOWER CORPORATION REQUEST FOR WAIVER TO PERFORM
ANNUAL INSPECTIONS IN PLACE OF QUARTERLY INSPECTIONS REQUIRED BY
47 C.F.R. SECTION 17.47(b)**

WT DOCKET NO. 05-326

Comments Due: February 23, 2006
Reply Comments Due: March 15, 2006

On May 19, 2005, the American Tower Corporation ("ATC") filed a Request for Waiver ("ATC Waiver Request").¹ ATC seeks a waiver of Section 17.47(b) of the Commission's Rules, 47 C.F.R. § 17.47(b), which provides that the owner of any antenna structure which is registered with the Commission and has been assigned lighting specifications pursuant to Part 17 "[s]hall inspect at intervals not to exceed 3 months all automatic or mechanical control devices, indicators, and alarm systems associated with the antenna structure lighting to insure that such apparatus is functioning properly."² Specifically, for towers utilizing the Eagle Monitoring System ("Eagle System") developed by Flash Technology, ATC seeks permission to perform an annual inspection of the towers in place of the required quarterly inspection.³ On November 14, 2005, ATC supplemented its waiver request with additional information regarding the technical characteristics and functioning of the Eagle System.⁴

Anthony Lehy, Senior Vice President, Associate General Counsel and Chief Compliance Officer, American Tower Corporation, to Jeffrey S. Steinberg, Deputy Chief, Spectrum and Competition Policy Division, Wireless Telecommunications Bureau (November 14, 2005) (*ATC Supplement*). This additional information was provided in response to a request by the Wireless Telecommunications Bureau's Spectrum and Competition Policy Division. See Letter from Jeffrey S. Steinberg, Deputy Chief, Spectrum and Competition Policy Division, Wireless Telecommunications Bureau, to Dennis P. Corbett, Leventhal Senter & Lerman PLLC (September 29, 2005).

ATC states that 4,694 of the towers that it owns or operates in the United States and that are subject to the Commission's lighting requirements currently are monitored utilizing the Eagle System.⁵ In its Waiver Request, ATC asserts that the self-diagnostic functions in the Eagle System are sufficiently robust that quarterly inspection is unnecessary to ensure that the control devices, indicators, and alarm systems on the towers are operating properly. In this regard, ATC maintains that the Eagle System provides the functional equivalent of a continual inspection of control devices from one central location and that users of this system will be alerted to actual and potential problems immediately, in many cases, or at most within 24 hours.⁶ ATC also states that, particularly for towers in remote locations, quarterly inspection imposes a substantial and unnecessary resource burden. ATC contends that without relief it will continue to carry out tens of thousands of quarterly inspections each year without a discernible public interest benefit.⁷
